

Tips for using MyMathLab on your Mac computer

Tips for configuring your browser

- * To use MyMathLab, you must set your browser to accept cookies.

To enable cookies in Firefox:

1. From the Firefox menu, choose **Firefox > Preferences**
2. At the top of the window, click the **Privacy** icon.
3. In the Cookies section of the window:
 - Check "**Accept cookies from sites**"
 - Check "**Accept third-party cookies**" (Firefox 3 only)
4. From the **Keep until** dropdown list, choose either "**they expire**" or "**I close Firefox**".
5. Close the Preferences window.

To enable cookies in Safari:

1. From the Safari menu, choose **Safari > Preferences**.
2. At the top of the window, click the **Security** lock icon.
3. Under Accept Cookies, make sure **Always** is selected.
4. Close the Preferences window.

- * If you have set additional security options (site filters, script controls, and the like) and encounter problems using MyMathLab, please contact Product Support to get additional help (1-800-677-6337).

Tips for using the TestGen plug-in

- * If your course includes TestGen tests, you must use **Safari** when taking these tests. Although the TestGen test will open in Firefox, certain features such as the navigation buttons do not work.
- * To install the TestGen plug-in, you need StuffIt Expander. If you do not have this program, you can download it for **free** from this site: <http://my.smithmicro.com/mac/stuffitexpander/download.html>.
- * After you have installed the TestGen plug-in, you need to quit and then reopen Safari to verify the installation.
- * If you are using an Intel-based Mac, you will also need to enable Rosetta to use the TestGen plug-in.

To check if your Mac is Intel-based:

1. From the Apple icon menu, select **About this Mac**.
2. Review the **Processor** information.
3. Intel-based Macs will have **Intel** in the processor description.

To enable Rosetta for Safari:

1. From the **Finder**, navigate to your **Applications** folder.
2. Select your web browser (do not open the application).
3. From the **File** menu, choose **Get Info**.
4. Check the box that says "**Open using Rosetta**".
5. Close the window to save your settings.
